## PROFILE

---

Computer Science undergraduate passionate about solving real-world problems using technology. Strong foundation in algorithms, database systems, real-time applications, and full-stack development. Skilled in C, C++, Python, Java, MySQL, PHP and front-end development with proven teamwork and leadership experience.

## SKILLS

---

|                               |                                                                      |
|-------------------------------|----------------------------------------------------------------------|
| <b>Programming Languages</b>  | C, C++, Python, Java                                                 |
| <b>Web Development</b>        | HTML, CSS, JavaScript, PHP, Node.js, Next.js                         |
| <b>Mobile App Development</b> | React-Native , Node.js, Next.js, PHP                                 |
| <b>Database</b>               | MySQL                                                                |
| <b>Core Competencies</b>      | Problem Solving, Analytical Thinking, Leadership, Project Management |
| <b>Languages</b>              | English (Fluent), Bengali (Fluent)                                   |

## RESEARCH INTERESTS

---

Cyber Security, Machine Learning, Software Development, IoT Systems

## EDUCATION

---

|                                                                                                                                                                                 |                |

| <b>Undergraduate Teaching Assistant</b><br><i>United International University (UIU)</i>                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                     | Summer 2025 - Present |
| <ul style="list-style-type: none"><li>· Assisted faculty in conducting Database Management System Lab sessions.</li><li>· Helped students understand SQL concepts, relational models, and database operations.</li><li>· Supported lab activities, code debugging, and evaluation of student submissions.</li><li>· Courses:<ul style="list-style-type: none"><li>• Database Management System Laboratory – CSE 3522 (Summer 2025)</li><li>• Database Management System Laboratory – CSE 3522 (Fall 2025)</li><li>• Structured Language Programming Laboratory – CSE 1112 (Spring 2026)</li><li>• Data Structure and Algorithms 1 Laboratory – CSE 1112 (Spring 2026)</li><li>• Software Engineering Laboratory – CSE 3422(Summer 2026)</li></ul></li></ul> |                       |

- Managed budgeting, financial planning, and documentation for the WIE Affinity Group.
- Coordinated workshops, events, and inter-department collaboration.
- Assisted leadership activities and student community initiatives.

## PROJECTS

---

### **SheSafe – Real-Time Female Safety and Emergency Response Platform**

**Project Details:** Developed a role-based emergency response platform for standard users, volunteers, police, and administrators. The system includes SOS alerts, live location tracking, responder coordination, safe-path routing, incident chat, user verification, admin monitoring, and emergency workflow management.

**Tech Stack:** React Native, Expo, Node.js, Express.js, MySQL, Google Maps API, WebSocket, JWT Authentication, Cloudinary

### **ResQher – Real-Time Female Safety Web Application**

**Project Details:** Built a web-based female safety application focused on emergency alerting, location tracking, and rapid response support. Implemented user-facing safety features, backend workflow, database operations, and map-based emergency location services.

**Tech Stack:** HTML, CSS, JavaScript, Laravel, MySQL, Google Maps API

### **Project Portfolio:** GitHub

### **Clinora AI – A guided journey from medical reports to informed doctor-led care and privacy-conscious research.**

**Project Details:** Clinora AI is a role-aware healthcare platform for managing verified Patient information, medical reports, care coordination, and evidence-backed AI explanations. The application separates deterministic clinical facts from AI-generated language: verified values, ranges, dates, comparison eligibility, and evidence remain Clinora's source of truth.

Clinora is not a diagnostic system, and its AI output does not replace professional medical advice.

**Tech Stack:** React Native, Expo, Node.js, Express.js, MySQL, Google Maps API, WebSocket, JWT Authentication, Cloudinary

## ACHIEVEMENTS

---

**1st Runner Up** – DBMS Lab, UIU CSE Project Show, Spring 2025

**3rd Runner Up** – Software Lab, UIU CSE Project Show, Spring 2026

**3rd Runner Up** – Aoop Lab, UIU CSE Project Show, Summer 2026

**Champion** – UIU Treasure Hunt, UIU App Forum

**Champion** – Prothom Alo Math Olympiad, District School Level, 2015

**1st Runner Up** – Prothom Alo Math Olympiad, District School Level, 2014

““

## EXTRA-CURRICULAR ACTIVITIES

---

Active Member, IEEE UIU SB

Participated in multiple academic competitions and technical events.
